### THE CHINA MAIL.

HONGKONG, WEDNESDAY, MARCH 11, 1868.

THE FAST INDIA TELEGRAPH COMPANY. It is not very long since we expressed our doubts as to whether the intention so confidently expressed in a letter to us by the Secretary of the East India Telegraph Company, to carry out a general telegraphic scheme along the Chinese coast, could be made good. We argued that the silence maintained as to their intended operations forboded anything but progress, and the event has justified the fears we then expressed. Two gen tlemen who were nominally employes of the company left Hongkong a short time since, in consequence, as they were inform ed, of the indefinite postponement of the attempt to lay a submarine cable. the present depressed state of the money market and the general disinclination which exists to attempt new enterprises especially those of which the cash returns are problematical—the decision come to of postponement is a wise one; but we are astonished to find that the views of Dr MacGowan, who was supposed have strongly advocated the laying of a and the Far East, submarine line, are, according to a North China contemporary, entirely opposed to any such project. "Dr MacGowan, the commissioner of the Company" (says the N. C. Herald), "did not encourage the company to undertake submarine telegraphy on the coast of China. He held that, not only would such cable be exposed to peculiar peril from the innumer

able tishing vessels that are ever dredging the coast—a peril which, it seems to us. might have been easily averted by sinking it in deep water-but that a submarine line is likely to be superseded as soon as land lines are constructed, a work which, according to Dr. MacGowan, th Chinese government proposed to undertake when, by means of their own scientific schools, they shall be provided with competent engineers." We must express considerable doubts as to the probability of the Chinese Government ever of their own free will, unsolicited and unaided by foreigners, undertaking any such project as the connection of their chief cities by the telegraphic wire; by "ever" we mean within the knowledge of the present generation. But there is another consideration, which, granting the probability of spontaneous Chinese action, it seems to us should not be lost sight of, Our own impression has hitherto been N.; had light wind nearly all the passage blinking the matter and indulging in ted old lady, with a frank, open counter vague and highflown declamation about ance, a warm heart full of kindness toward and in many rethe good which would accrue to China others, tall and sleuder, and, in many re-The Bremen 8-masted schooner Char- by the adoption of foreign telegraphs and spects, very much like the President lotta, from Saigon, reports variable winds and calms in China sea, variable winds and heavy sea till arrival in port.

Shanghai, it is hardly likely that any such telegraph would be open to the commercial purposes for which the majority of our readers would care to see such a thing established. We must look at the matter simply from the European point of view, and thus regarded we can see nothing but a total abandonment of the project in the expression of opinion put forth by the former representative of the American company. But it would surely be wise to ascertain by a detailed and personal canvass of those representing foreign houses in China the actual opinion held upon the matter, before finally giving up a scheme which seems to promise so many advantages to trade and diplomacy. If the company is bona fide and would be able, supposing it were well supported, to carry out the programme it announced, let it depute some intelligent agent to spend three months upon the coast with the one object of "bolling" the mercantile world in China upon the subject. Then at least there would be certain data to go upon, and the published result of such an enquiry would be beneficial, whether its evidence was of a nature to put an end to grand but vague schemes, or on the other hand to give reasonable hope that a judicious combination of labour and capital would yield results immediately advantageous to the foreigner, and, in the future, of essential use to the native.

THE KIACHTA TELEGRAPHIC

WE observe that the telegraphic line via Kiachta opened in England on the 18th February, so that the first telegrams will arrive in Shanghai about this date. The programme published by Mr Grant gives some explanations of the delays, which occurred last year, and as they may be interesting to our readers, we extract Six couriers are to be run during May and June, those months being the most fruitful in delays owing to the inundations which sometimes take place by the overflow of the Rivers, Irtisch Obi, and Yenessei. In 1867, over 800 versts of Telegraph line were swept away from time to time, but it is said that

these accidents are rare. A courier having been killed by a fall from his horse last year, the telegram bag was lost, and has not yet been recovered. This accounts for the grave delay which occurred on one occasion, and which it was reported materially affected for a time the credit of a large house. In order to prevent a recurrence of the inconvenience, it is the intention of the Proprietor to open all telegrams addressed to his care, and forward duplicates by the subsequent courier to their respective address, unless he be specially notified to the contrary. The number of Stations in Mongolia will be double this year. Centracts have been made to deliver telegrams between Kinchta and Tientsin in twelve days; the non-fulfilment of the contracts as to time entails a penalty upon the contractors of from 1 to 3 taels per hour (6s. to 18s.), thus giving a guarantee that delay will not occur. After the first two months of the season, which are the most severe as regards the climate, the contractors

will reduce their contract time to ten Eighteen days is the time given for the transmission of telegrams under favorable circumstances, though we expect that from 21 to 24 days will represent a pretty correct average. Mr Grant deserves credit for the perseverance with which he carries out his determination of establishing a reliable service, and all will wish him success who are interested in a speedy communication between England

THE following notice will sufficiently demonstrate that the Colonial Government is anxious to meet the reasonable necessities of the public as regards the working of the Stamp Act. We have but little doubt that the Commission will inaugurate some practical reforms in those details which it is felt bear most hardly upon those concerned, and we trust that the colonists will respond to the invitation and place every possible in-

formation in the hands of the committee. His Excellency the Governor having appointed the Undersigned a Commission to enquire into and report upon any defects which may have arisen in the working of the Stamp Ordinance No. 12 of 1800 It is hereby notified that they will hold their meetings at the Council Chamber every day up to Saturday, the 21st instant nolusive (Sunday excepted), and they will be prepared to receive from the Public apy communications, either oral or written, on the subject, between the hours of Noon and 2 P.M. on any of the above mentioned days.

OUR Canton correspondent writes under date March 9 :- Our respected old Consul has temporarily taken leave of us, during whose absence the Consulate will be charge of the vice-Consul: If one should happen to take up and glance over the pages of an old directory, say of 1848, he cannot fail to observe therein the name of Mr Ro bertson in the Shanghai department of the civil service not only of Queen Victoria but also of the King of Denmark. Thus it is at once clear that our Consul has resided in China for nearly a quarter of a century without paying even a short visit home, and he is, perhaps, at the present time the oldest resident—unquestionably the oldest member of the Consular staff-in China, the prima facie sense of the word. As such and with his knowledge of the country and its institutions both native and foreign Mr Robertson had greater claim to succeed Sir John Bowring as your Governor than Robinson and Richards. But speaking of the old directories, the one of the abovementioned year bears indeed a striking contrast with that of the present day, as far as Canton is concerned. In the year spoken of there were no less than 84 mercantile establishments of all nationalities, muster ing up a community of 295 individuals as residents, partners, and assistants, who were very confortably packed up at the old factories. Whilst we have now uo more than 35 mercantile establishments of all nationa lities forming a community of 45 indivi duals only as resident partners and assist ants. Terrible indeed has been the blow dealt to this place by the foreign elements which seems to have been returned with a vengeauce by the Rams guarding this southern metropolis of the Celestial empire, for in the days of the old factories one would have sooner believed in the truth of the histories in the Arabian Nights than it the report of bankruptcy of an A 1 taipan Indeed the question may be justly asked what has this place—once the chief emporium of foreign commerce in the Far East and where our predecessors amassed fortunes—come to, or what shall it be twenty years hence? Although the Customs' signalising lookout is an established institution, and some signals are made, they are a puzzle to those who are not behind the scenes at the offices of maritime customs, for the public have not yet been posted up on the customs'

telegraph. But if the construction of the loo-out is intended only to make known the astounding fact that the upward-bound steamer will be at the wharf in a few minutes, surely nothing can be achieved thereby to justify the object of such a fine and coatly an erection. Our deputy commissioner seems determined to collect from us the subscription of \$2 per month (putting thereby into the Customs' coffers \$42 monthly) for the Daily Return, on the plea, as set forth in his prospectus, of "defraying the expenses of circulating the Return on the Honam and Canton sides." After this to speak of the Chinese "squeeze" would be absurd and contrary to the Christlan principle "to do unto others as you would have others do unto you." Kidnappers have again appeared on the

tken up some days ago by the revenue officers and handed over to the mandarins to be dealt by according to their tender mercies. They are said to have come up in the blacao steamer and been caught whilst attempting to bundle off their spotted victim, who had also come up in the steamer. Some days previous to this occurrence, it is statel, a similar attempt at kidnapping had been made, but the would-be victim jumped loto the water and was picked up by the nan-stealers, who, bent upon forcibly keep by him on board, torcatened to flog him. In the interior a Custoins officer interposed and set the man at liberty, although everybody on board except a Chinaman professelignorance of what had taken place or matter. what was up.

It is rumoured, and a contemporary gives turrency to the rumour while guarding minself against vouching for its correctness, that it has been decided to despatch to Galle without delay a wing of a European Regiment. We hardly think there can be Madras Athenœum of Feb. 13:any foundation for this rumour, especially in view of the clear and distinct terms in which the Duke of Buckingham wrote on

Dr Waters, who already stands committed for having taken part in an illegal procession in Dublin, was on Saturday arrested and taken care of in Kilmainham Gaol under a special State warrant. Dr Waters is reputed to be the Editor of the Irishman. Yesterday week that troubled and troublesome spirit, George Francis Train, was arrested at Queenstown, upon his return to England in the Cunard steamship Scotia, and lodged in gaol. While in America he had done much to foment the Fenian movetrue, who would fight for faith, home, and native land. KONIGLICH PREUSSISCHES CONSULAT.

Hongkong den 9ten Marz, 1838

I IE nachstehende Bekanntmachung des Königlichen Geschäftsträgers zu Japan wird hierdurch zur Kunde der preus-Bischen Unterthanen und Schutzgewossen gebracht,

J. MENKE. Stellvertreter des Consuls

BEKANNTMACHUNG. Da nach officiellen Kachrichten in Japan der Krieg zwischen Seiner Majestät dem Mikado und dem Taikuhn ausgebrochen ist, und die Beobachtung strenger Neutralitat dadurch nothwendig wird, so macht der Unterzeichnete Geschäftsträger Seiner Majestät des Königs von Treussen in Japan die preussischen Unterthanen Schutzenossen darauf aufmerkeam, dass eine Betheiligung an dem Kriege, selbst in der Eigenschaft als Nicht Combattant, die Zuführung von Kriegs und Transportschiffen, die Zuführung und Beförderung von Militärpersonen, Depeschen und zur Kriegscontrebande gehörigen Gegenständen in preussischen Kauffahrteischiffen für irgend einen der beiden Theile nach den Grundsätzen des Volkerrechts eine Verletzung der Neutralität in sich schliessen und als feindliche geahndet werden können.

behandelt werden, wahrend die Schiffe und to the Public from this date during certain son or Persons resident in the Colony. sonstigen Transportmittel der Wegnahme Alterations and Repairs, und Confiscation unterliegen, welche auch auf die Uebrige, etwa vorhandene, Neutralen gehörige Ladung ausgedehnt werden

Jede Verletzung der Neutralität durch proussische Untertlianen und Schiffe würde dieselben ausserdem der Gefahr aussetzen, ihrer Ausprüche auf den Schutz der Königlichen Regierung sowie auf die in dem prenssisch-japanischen Vertrage garantirten Riechte und Privilegien verlustig zu gehen. Hiogo, Kohe, den 18ten Februar, 1868. Der Königliche Geschäftsträger.

A very useful book has just been issued from the Press in Hongkong under the title of the " Guide Book and Vade-mecum to the Treaty Ports of China and Japan, compiled and edited by Mr N. B. Dennya The Book is very conveniently got up : interspersed with maps of the various treaty ports, and contains, besides much useful local information, historical sketches much interest. Our readers will feel maturally interested in what is said concerning Shanghai; and a good idea of the history of this place is conveyed in Mr Lennys' work. \* \* \* The other in China and also those in Japan are carefully described, and almost all ticulars which can be required by the traveller or resident are to be found in this work, which may be justly regarded as the "Murray" for China.

With the exception of the comparative thinness of the paper, the getting-up of the work is very creditable to all concerned; and we have sincere pleasure in congratulating the authors and publishers on the considerable merit of their admirable enterprise and performance.

From the Englishman (Calcutta) of June 8:-'The celebrated volumes of the French Abbé Hue on China, and Sir Rutherford Alcock's account of Japan are, no doubt, works of a far higher classand more extensive scope than the one now before us; but for practical utility, for all purposes of locomotion, trading and residence in any of the places coming within its compass, The Treaty Ports of China and Japan, by Messrs Mayers, Dennys and King, tar surpasses them.
